

B&K PRECISION LEVELERS. BETTER BUILT, BY DESIGN.

B&K Levelers are built to ensure precision shape correction and material flatness. From rugged, all-steel upper and lower housings to high quality alloy steel back-up and work rolls, you won't find a better built leveler on the market, backed by a **2-year warranty on all components**. Machine widths from 24" – 96" are available with 4-high or optional 5- and 6-high roll arrangements. B&K...the best built, best backed levelers you can buy.

Stress-relieved, all-steel fabricated upper housing

Manually adjustable leveler fixed upper back-ups for greater leveling control

Leveler upper work rolls, heat treated to 62-64 Rockwell C scale
