

# WHEN IT COMES TO CORRECTIVE LEVELING,

## **B&K = ROI**

If you're looking to maximize return on investment, you simply can't do better than B&K. These rugged levelers are better built by design to ensure precision shape correction and material flatness. B&K levelers are the ideal solution to problems posed by coil set, cross bow, wavy edge and center buckled material. Intuitive touch screen controls with graphic interface provide ease of set-up and operation for any type strip correction.

Available in standard 4-high and optional 5- or 6-high roll arrangements with material width capacities from 18" to 96". Ensure dead-flat panel or strip for increased productivity and part quality with B&K levelers.
